

QA ENGINEER ASSIGNMENT 2026

OrangeHRM — Manual Testing & QA Report

Candidate Name: [Your Name]	Application: OrangeHRM OS 5.9
Application URL: https://opensource-demo.orangehrmlive.com/	Testing Type: Manual & Automated QA
Browser / OS: Google Chrome / Windows	Test Account: Admin / admin123

1. Objective

The objective of this assignment is to manually test the OrangeHRM web application, with focus on: Login functionality, Employee management (adding, viewing, updating, and deleting employees), searching and verifying employee records, identifying potential bugs and usability/accessibility issues, documenting comprehensive test cases, and preparing workflows for POM-based Selenium automation.

2. Application Under Test

URL: https://opensource-demo.orangehrmlive.com/web/index.php/auth/login

Credentials: Username: Admin | Password: admin123

Browser: Google Chrome (Desktop / Windows environment)

3. Login Test Cases

A total of 10 primary login test cases were designed and executed manually.

TC ID	Scenario	Test Steps	Expected Result	Actual Result	Status
LOGIN-001	Login with valid credentials	1. Open login page. 2. Enter Admin. 3. Enter admin123. 4. Click Login.	User successfully authenticated and redirected to Dashboard.	Logged in successfully; Dashboard displayed.	Pass
LOGIN-002	Invalid username	1. Open login page. 2. Enter invalid username. 3. Enter valid password. 4. Click Login.	Login fails with appropriate error message.	'Invalid credentials' displayed.	Pass
LOGIN-003	Invalid password	1. Open login page. 2. Enter username Admin. 3. Enter invalid password. 4. Click Login.	Login fails with appropriate error message.	'Invalid credentials' displayed.	Pass
LOGIN-004	Both fields empty	1. Open login page. 2. Leave fields empty. 3. Click Login.	Required field validation displayed for both fields.	'Required' validation displayed under both inputs.	Pass
LOGIN-005	Username empty	1. Leave Username empty. 2. Enter valid password. 3. Click Login.	Username displays required validation message.	'Required' displayed under Username field.	Pass
LOGIN-006	Password empty	1. Enter valid username. 2. Leave Password empty. 3. Click Login.	Password displays required validation message.	'Required' displayed under Password field.	Pass
LOGIN-007	Password masking	1. Open login page. 2. Enter password. 3. Observe field.	Password masked as bullet/dot characters.	Password displayed as masked characters.	Pass
LOGIN-008	Forgot Password page	1. Open login page. 2. Click 'Forgot your password?'.	User redirected to password recovery page.	Password recovery page opened successfully.	Pass
LOGIN-009	Invalid username & password	1. Enter invalid username. 2. Enter invalid password. 3. Click Login.	Login fails with appropriate error message.	'Invalid credentials' displayed.	Pass

LOGIN-010	Login after failed attempt	1. Enter invalid credentials. 2. Click Login. 3. Enter valid credentials. 4. Click Login.	User successfully logs in after correcting credentials.	Dashboard displayed after valid credentials entered.	Pass
-----------	----------------------------	--	---	--	------

4. Employee Management Test Cases

Workflow: PIM → Add Employee → Employee List → Search → View → Update → Delete

Employee Name	Employee ID	Current Status
Chandra Swaroops Palika	0694	Active (Middle name updated from Swaroop to Swaroops)
Priya M Nair	0695	Deleted (Successfully removed)
Rahul K Verma	0696	Active
Ananya P Singh	0697	Active

EMP-001 — Duplicate Employee ID Validation	Status: Pass
Test Steps: 1. Navigate to PIM → Add Employee. 2. Enter valid employee info. 3. Enter an existing Employee ID. 4. Click Save.	Expected: System prevents creation and displays duplicate Employee ID error. Actual: Validation message displayed indicating Employee ID already exists.

EMP-002 — Add Employee with Valid Details	Status: Pass
Test Steps: 1. Navigate to PIM → Add Employee. 2. Enter name details. 3. Enter unique Employee ID. 4. Click Save.	Expected: Employee created successfully and profile displayed. Actual: Employee Chandra Swaroop Palika created successfully (ID 0694).

EMP-003 — Verify Employee in Employee List	Status: Pass
Test Steps: 1. Navigate to PIM → Employee List. 2. Enter name in search. 3. Select autocomplete suggestion. 4. Click Search.	Expected: Newly created employee appears in search results with correct details. Actual: Employee record for Chandra Swaroop Palika (ID 0694) found.

EMP-004 — View Employee Details	Status: Pass
Test Steps: 1. Search for Chandra Swaroop Palika. 2. Click on record to open profile. 3. Review Personal Details.	Expected: Employee profile opens and displays saved information accurately. Actual: Profile opened successfully; personal details match.

EMP-005 — Update Employee Information	Status: Pass
Test Steps: 1. Open employee profile. 2. Update middle name from Swaroop to Swaroops. 3. Click Save.	Expected: Updated information saved successfully and reflected on profile. Actual: Success toast displayed; name updated to Chandra Swaroops Palika.

EMP-006 — Cancel Employee Deletion	Status: Pass
Test Steps: 1. Navigate to Employee List. 2. Search employee. 3. Click Delete icon. 4. Click 'No, Cancel' in modal.	Expected: Confirmation dialog closes; employee record remains unchanged. Actual: Deletion cancelled; employee remains present in list.

EMP-007 — Delete Employee	Status: Pass
Test Steps: 1. Search for Priya M Nair. 2. Click Delete icon. 3. Click 'Yes, Delete'. 4. Reset search & search again.	Expected: Employee permanently deleted; subsequent search yields no records. Actual: Priya M Nair deleted. Search returned 'No Records Found'.

5. Accessibility / Keyboard Testing

A keyboard-only accessibility test was performed on the OrangeHRM login page using the **Tab** key.

Expected Order: Username → Password → Login → Forgot your password?

Observations: Username and Password were reached relatively late in the tab sequence. The Forgot Password link was not reached during standard keyboard navigation. Pressing Enter submitted the form correctly.

6. Bugs / Usability Issues

BUG-001 — Generic Invalid Credentials Message

Severity: Medium | Type: Usability / Security Feedback

Module: Login Module
Description: When an incorrect username or password is entered, the system displays a generic 'Invalid credentials' message without clarifying which field was incorrect.
Actual Result: The app displays 'Invalid credentials' for both invalid username and invalid password.
Impact: Provides low clarity for legitimate users who made a single typo.

BUG-002 — Poor Keyboard Navigation / Tab Order

Severity: Medium | Type: Accessibility / UI

Module: Login Module
Description: Login form focus sequence does not follow natural top-to-bottom keyboard navigation flow.
Actual Result: Username & Password inputs are reached late in the tab order; 'Forgot your password?' is skipped.
Impact: Impairs usability for keyboard-only and assistive technology users.

BUG-003 — Forgot Password Returns 504 Gateway Time-out

Severity: High | Type: Functional / Server Availability

Module: Login / Recovery
Description: Submitting a password recovery request for a valid user returns a 504 Gateway Time-out page.
Actual Result: Application displays: '504 Gateway Time-out nginx/1.18.0 (Ubuntu)'.
Impact: Critical failure preventing users from recovering their accounts.

7. Additional Observations

7.1 Employee ID Retention: When adding consecutive employees, the ID field pre-filled previously submitted numbers.

7.2 Employee Name Search: Autocomplete search works effectively when full name recommendations are selected.

7.3 Employee ID Search: Partial ID searches (e.g. '069') do not match records, whereas full ID ('0694') works.

7.4 List Ordering: Newly added employees appear based on default sorting rather than top of list.

7.5 Search State Reset: Immediate search post-deletion requires clicking 'Reset' to clear cached parameters.

7.6 Recovery Email Requirement: Employee creation does not mandate email binding unless user login account is enabled.

8. Manual Login Test Script

Objective: Verify that a valid user can log into OrangeHRM, access the Dashboard, and log out.

Steps: 1. Open login page → 2. Enter Admin → 3. Enter admin123 → 4. Click Login → 5. Verify Dashboard header → 6. Click User Profile → 7. Click Logout → 8. Verify return to Login URL.

9. Automation Approach & Technology Stack

Component	Technology / Tool
Programming Language	Python 3.12
Automation Library	Selenium WebDriver 4.x
Test Runner Framework	PyTest
Design Pattern	Page Object Model (POM)
Browser Driver	Google Chrome (Selenium Automated Manager)
Version Control	Git & GitHub

10. Deliverables & Submission Links

GitHub Repository: [ADD YOUR GITHUB LINK HERE]

Includes full POM framework: pages/login_page.py, pages/dashboard_page.py, pages/pim_page.py, tests/conftest.py, tests/test_login.py, tests/test_employee_management.py, requirements.txt, pytest.ini.

Loom Video Walkthrough: [ADD YOUR LOOM LINK HERE]

2–3 minute walkthrough demonstrating manual findings, POM architecture, and Selenium PyTest execution.

11. Conclusion

The manual testing phase successfully validated OrangeHRM login and employee management modules across 17 distinct scenarios. Key findings including generic error messaging, keyboard accessibility gaps, and server-side 504 recovery timeouts were identified and documented. The automated test suite built with Python, Selenium, PyTest, and Page Object Model (POM) automates end-to-end employee lifecycle workflows cleanly without hardcoding dynamic employee IDs.
